

ACI-400LD AC Industrial Gearmotor

FEATURES

- **Foot (Leg)-Mount Gearmotor**
- **Power: 400 Watts**
- **Gear Ratios from 5:1 to 200:1**
- **Frequency: 60Hz**
- **Three-Phase Operation**
- **IP55 Rated**
- **Class F Insulation**
- **High Starting Torque for High Inertia Loads**
- **Long Lifetime**

DESCRIPTION

Anaheim Automation's Industrial Gearmotors offer high-quality and affordability with a wide variety of options to choose from. These 400 Watt gearmotors are offered in the foot (leg) mounting option with a top-located terminal box and brake, and are available in a variety of sizes and gear ratios. They run off of a three-phase power supply, and depending on the wiring configuration can operate at 220VAC or 380VAC. For assistance in selecting the appropriate AC Industrial Gearmotor, please contact an Anaheim Automation Applications Engineer.

SPECIFICATIONS

Capacitor: uF/VAC	Not Required	Duty Cycle:	Continuous
Phase:	Three-Phase	Ambient Temp:	-10°C ~ 40°C
Frequency:	60Hz	Ambient Humidity:	Under 85% without Condensation
AC Gearmotor Type	Industrial	Insulation Rating	F (155°C)

Note: Ratios 5:1 through 30:1 the gearbox output shaft spins in the same direction as the motor. Ratios 40:1 through 200:1 the gearbox output shaft spins in the opposite direction.

Note: Application of Permissible Overhung Load (OHL) is based on the center of output shaft extraction length.
