DESCRIPTION

The 23Y Series High Torque Stepper Motors offer a great value without sacrificing quality. These motors were designed to offer the highest possible torque while minimizing vibration and audible noise. A broad line of motor windings and stack lengths are available off-the-shelf. The standard 8-lead motors can be connected in all possible configurations: series, unipolar or parallel, to allow the maximum flexibility for your application. We can also customize the winding to perfectly match voltage, current, and maximum operating speed to meet your requirements.

See [Accessories](#) on our website for optional motor adders such as encoders, brakes, cables, and connectors. For compatible drivers, see the [MBC25081TB](#), [MBC05641](#), [MBC12101](#), and [Driver Packs](#).
